Subject: Please review - Split Sampling Plan Draft
Attachments: Split Sampling Plan Red Hill DRAFT 12DEC16.pdf; Attachments SSP Red Hill December DRAFT.pdf

Hello Steve and Roxanne,

I've attached a draft Split Sampling plan for your review, please take some time to read at least the main document which is only eleven pages. The last attachment in the index references lab SOP's from the Navy's lab (APPL Inc.) which are watermarked as confidential so as a precaution I am not transmitting them (I will assume you have already seen them or have access to them via the Navy if you so desire). We're still in discussion about how we will deal with the lab's SOP's when the document becomes public.

For now please review the split sampling plan, especially as it pertains to DOH's role in the process. You do not need to review the attachments (though they are included), and it is my preference to get comments on the main body of text.

Comments by EOD Monday December 19th would be appreciated, as we will have to route any major changes through our QA office and the holidays tend to make everything slower.

I hope you all enjoyed your time in the field & feel free to give me a call or send me an email if you have questions.

Thanks,

Lyndsey Tu
